# Annie Kempf

Software developer

In the spring of 2024, I'll conclude my final semester in the Systems Science Bachelor's program at Lund University, earning a Bachelor of Science in Information Systems. I'm eager to secure a full-time position as a Software developer rapidly after graduation and, as always, prefer to be proactive. I am interested in both front-end and back-end developing, and am open to specializing in either one (or both).
